Russia's military invasion of Ukraine on February 24, 2022 marks a turning point for Europe. Within a very short time, the fronts between West and East hardened massively. The European Union and the USA have reacted to the Russian invasion with a comprehensive package of sanctions, which include the Russia from the SWIFT payment system. The measures are aimed at isolating the Russian Federation internationally and causing maximum damage to its economy. However, they will also leave their mark on the economies of Europe and the USA. At the moment, the consequences of a long-term cooling of relations with Russia for the European economy are still completely unpredictable, or if the conflict should expand and spread to other states - especially if these are NATO member states. How China will position itself in the further course of the conflict is still a major factor of uncertainty. The AURELIUS Equity Opportunities Group is directly or indirectly affected by the aforementioned risks, which can have a negative impact on the net assets, financial position and results of operations and corporate planning of the AURELIUS Equity Opportunities Group. The AURELIUS management analyses the situation of the investments promptly and in close consultation with the local operational management. Due to the close proximity to the investments, possible countermeasures can be implemented quickly.
